

Blood Detective Nutritionals

C-Max

- **A dietary supplement to support immune system function and collagen health.***

- **Vitamin C:**

- Helps maintain collagen*
- Helps form red blood cells*
- Provides antioxidant protection against free radicals*
- Supports the immune system*

- **C-Max** contains Vitamin C in a buffered Ascorbate form. Ascorbate is a Vitamin C molecule with a mineral ion. All Vitamin C must link up with a mineral before it can be absorbed into the blood stream. By supplying minerals along with Vitamin C, **C-Max** supports the immediate assimilation of Vitamin C in the body.* Because **C-Max** is in the Ascorbate form and the presence of minerals help to act as natural buffers, it helps prevent stomach irritation that is common in non-buffered formulas.*

- Vitamin C or Ascorbic Acid belongs to a class of vitamins which are termed water-soluble nutrients. It is not stored in the body and should be replenished throughout the day and evening for optimal health.* As a water soluble vitamin, the body is able to excrete any unneeded levels of Vitamin C, which allows for flexible dosing.*

- **C-Max** contains Bioflavonoids, which increase the effectiveness of Vitamin C by 50%.* Calcium, Magnesium, Zinc, Manganese and Potassium are included in the **C-Max** formulation. The diuretic effect accompanying higher intake of Vitamin C often depletes the body's store of vital minerals. **C-Max** provides a bioavailable source of minerals.* Pectin has been shown to be beneficial in managing cholesterol levels within normal ranges.*

Supplement Facts

Serving Size: 1 Tablet

Each serving contains:

Vitamin C	1,000 mg
Calcium	90 mg
Magnesium	40 mg
Zinc	2.5 mg
Manganese	125 mcg
Potassium	60 mg
Pectin	100 mg
Mixed Bioflavonoids (rose hips, orange, lemon, grapefruit, acerola cherry, hesperidin, rutin)	100 mg

Other ingredients: ascorbic acid, mineral ascorbates (calcium ascorbate, magnesium ascorbate, zinc ascorbate, manganese ascorbate) calcium carbonate, potassium citrate, citrus pectin, magnesium stearate, croscarmellose cellulose, silicon dioxide, microcrystalline cellulose, stearic acid, hydroxypropyl methylcellulose.

- **Suggested Use:** As a dietary supplement, take one tablet with each meal, or as directed by your health care practitioner.
